

This course describes what logistics is and will teach learners to draw a logistics system, and then analyse it to identify areas where improved performance and/or integration can enhance the effectiveness of the total supply chain.

### Benefits of attending this courses

On completion of this course, the learner will be able to analyse logistics systems, recommend areas for improvement, develop and implement strategic logistics plans.

### Course Options

- Classroom Facilitated – can be conducted on-site. Talk to us about this option
- Public courses – check the latest schedule for dates
- Digital Blended Learning – Download your text books and attend revision sessions
- Self-study – Download your Text books and assignments and complete at your own pace
- Customised – all learning materials can be customised to include internal SOP's

### Who should attend and prerequisites

This course is intended for warehouse and logistics managers who need to improve their strategic logistics skills.

Learners should be competent in communication and mathematics, (NQF Level 4) supply chain management philosophy, the execution of supervisory tasks and quantitative techniques (NQF Level 5)
