

PURCHASING

This Learnership focuses on the role of the strategic purchasing and procurement practitioner. Purchasing is an integral part of effective supply chain management and understanding the interconnection is covered extensively in this Learnership. Using technology and building collaborative relationships is a key to successful procurement strategies.

Benefits of attending this Learnership

Qualifying learners will be able to:

- Understand and apply supply chain principles and philosophy
- Understand the importance of technology to effective supply chain management
- Manage supply chain relationships and Apply professional values and ethics
- Develop a sourcing strategy
- Understand the implications of international trade
- Develop and implement inventory strategies
- Understand key issues which are important to corporate governance and social responsibility

Course Options

- Classroom Facilitated – can be conducted on-site
- Digital Blended Learning – Download your text books and participate in remote access lessons on line
- On-line learning – Download your text books and study at your own pace. Take quizzes and FSA's on line, submit your PoE on line
- Customised – all learning materials can be customised to include internal SOP's relevant to the business

Who should attend and prerequisites

The target groups for this qualification are people working within operational to middle management positions within the various processes of the supply chain or those who are aspiring for such positions. Learners who have, in the past, held a supervisory position within the various supply chain processes are most likely to find the qualification applicable to them.

Learners should be competent at NQF level 4 in English Communication and Mathematics. Previous experience with Supply Chain will assist the learner but is not a prerequisite.
