

Warehousing and stock control are often thought of as simple tasks which do not require much skill. However, with the sophistication that has been brought into the supply chain and the need for everyone to be attuned and functioning at their peak, many businesses have come to realise the importance of high quality training for warehouse personnel.

Benefits of attending this courses

This course will provide the delegate with a detailed understanding of the responsibility given to him or her to manage functions within the warehouse. The course provides insight into the impact that the warehouse activities have on the greater Supply Chain. The practical workplace assignments make this an excellent course for those wanting to add value to their working environment and improve their career opportunities.

Course Options

- Classroom Facilitated – can be conducted on-site. Talk to us about this option
- Public courses – check the latest schedule for dates
- Digital Blended Learning – Download your text books and attend revision sessions
- Self-study – Download your Text books and assignments and complete at your own pace
- Customised – all learning materials can be customised to include internal SOP's

Who should attend and prerequisites

This course is aimed at Warehouse Practitioners who have responsibilities for activities in the warehouse. This course also provides an excellent grounding for other Supply Chain personnel who need to understand how the warehouse activities can affect their own role.

Learners should be competent at NQF level 2 in English Communication and Mathematics. Previous experience with warehouse operations will assist the learner but is not a prerequisite.
