

This course is intended for people who operate in the purchasing and procurement environment and need to identify ways to improve the performance of their supply chain. Data and information are key resources when analysing the performance and making decisions for improvement. Of course, no plans are complete with a means to measure their effectiveness.

Benefits of attending this courses

On completion of this course the learner will be able to identify information to be analysed and evaluated, identify stakeholders who are involved in decisions, and articulate the supply chain processes needed for success. Examination of data will highlight various performance measurement tools that can be used and the effectiveness of measurement in improving supply chain performance, information and measurements.

Course Options

- Classroom Facilitated – can be conducted on-site. Talk to us about this option
- Public courses – check the latest schedule for dates
- Digital Blended Learning – Download your text books and attend revision sessions
- Self-study – Download your Text books and assignments and complete at your own pace
- Customised – all learning materials can be customised to include internal SOP's

Who should attend and prerequisites

This course is intended for decision makes in the supply chain who can influence improvements in the organisation.

Learners should be competent in Communication and Mathematics, the execution of supervisory tasks, understanding of the supply chain philosophy and presentation skills (NQF Level 4)
