

This course is intended for people who form part of the supply chain and are responsible for assessing and monitoring risk. Risk can be associated with both processes and operations and being able to identify where the risk lies and how to mitigate it is a key function.

Benefits of attending this courses

On completion of this course, the learner will be able to identify the factors which constitute risk, examine organisational policies and procedures in terms of risk, identify potential risk factors and find possible scenarios which are documented and can reduce risk. Developing a contingency plan for managing risk is covered in this course.

Course Options

- Classroom Facilitated – can be conducted on-site. Talk to us about this option
- Public courses – check the latest schedule for dates
- Digital Blended Learning – Download your text books and attend revision sessions
- Self-study – Download your Text books and assignments and complete at your own pace
- Customised – all learning materials can be customised to include internal SOP's

Who should attend and prerequisites

This course is intended for decision makers in the supply chain who can influence decisions related to risk in the organisation.

Learners should be competent in Communication, Mathematics and computer literacy (NQF Level 4)

How to Book

Complete the form on our website to enquire about this course and make a booking.

Course Outline – Key Learning Points

- The concept of risk is explained with reference to accepted theory and practice
- Identify the factors which could constitute risk
- The role of organisational policies and procedures are explained in relation to risk management
- Possible scenarios that could constitute a risk are identified and documented
- Priorities resulting from the impact analysis are determined and documented for implementation in the event of the risk materialising
- Contingency plans are developed and documented in accordance with the entity's policies and procedures
- Recommendations on improvements to the contingency plans are documented in relation to the findings of the testing

Accreditation and Assessment

TETA Unit Standard: NLRD252025

This unit standard is on NQF Level 5 and has 8 credits.

Delegates are required to submit a Portfolio of Evidence (POE) and Final Summative Assessment (FSA) results in order to be accredited against this Unit Standard.

Duration and delivery options

This course is conducted over 1 day or 2 half days. A delivery schedule is provided for submission of POE's and FSA's. Flexible time slots can be agreed for groups of 8 or more.

All courses can also be taken on line at a reduced fee.

Where to next..?
