

The Chartered Institute of Logistics and Transport

Professional Diploma in Logistics and Transport

Logistics and Transport keep goods moving around the world. The Chartered Institute of Logistics and Transport (CILT) is the leading international body for everyone who works within supply chain, logistics and transport. This Professional Diploma will provide you with the skills you need to enhance your career in the fields of transport and logistics.

BIZZCO has collaborated with CILT International to provide you with a learning pathway which will allow you to achieve accreditation in your own country and an international certification from CILT International.

This Diploma course aligns with the CILT Level 5 diploma: it has 2 mandatory modules and 5 elective options. To achieve certification, the learner must complete 4 modules.

What is covered in this course?

Mandatory Modules		
BPD01 Management in Transport and Logistics		
Learning Unit 1: Management Practices	Learning Unit 2: Technology in the Supply Chain	Learning Unit 3: Supply Chain Relationships
Evolution of Management Practices	Introduction to Supply Chain Technology	Stakeholders in The Supply Chain
Organizational Behaviour	Choosing an Effective Information Systems	Operational Relationships and Communication
Concept of Leadership	Designing and Implementing Information Systems	Maintaining Customer Relationships
Management Practices	Measuring and Improving the Information Systems	Communication with Stakeholder
BPD02 Supply Chain Management		
Learning Unit 1: Supply Chain Philosophy	Learning Unit 2: Supply Chain Performance	Learning Unit 3: Supply Chain Practices
Supply Chain Philosophy	Defining Supply Chain Performance Measurement	Organisational Strategy and Supply Chain Performance
Implementing A Successful Supply Chain	Performance Management Objectives	Ethics as A Foundation for Business Practice
Demand, Acquisition, Distribution, Disposal	Tools and Techniques for Performance Measurement	Supply Chain Risks
Purchasing in The Supply Chain	The Organisational Structure	Improvements in Supply Chain
Elective Modules		
BPD03 Transport Operations		
Learning Unit 1: Transport Logistics	Learning Unit 2: Operations of Transport	Learning Unit 3: Resourcing of Transport
Logistics Principles	Modes of Transport	Costing of Transport Operations
Transport Service & Infrastructure	Handling of Dangerous Goods	Retail Logistics Characteristics
Global Supply Chains	Packaging for Transportation	Reverse Logistics
International Trade Processes	Freight Transportation	Refunds, Claims and Disposal Strategies

BPD04 Inventory

Learning Unit 1: Inventory Principles	Learning Unit 2: Inventory Implementation	Learning Unit 3: Inventory Measurements
Inventory and Inventory Management	Inventory Policy	Financial Reporting in Relation to Inventory
Functions and Classification of Inventory	Inventory Replenishment Rules	Measuring Inventory Across the Supply Chain
Types of Inventory	Impact of Inventory on Customer Service	Safety Stock and The Bullwhip Effect
Cost of Inventory	Inventory Valuation Methods	Inventory Performance Measurements

BPD05 Warehousing

Learning Unit 1: Warehouse Management Principles	Learning Unit 2: Warehouse Operations	Learning Unit 3: Warehouse Technology and Improvement
Logistics Strategy	Warehouse Facility Location	Material Handling for Transportation
Warehousing in The Supply Chain	Warehouse Cost Management and Performance Control	Importance of Stock Taking
Inventory in The Warehouse	Inbound and Outbound Logistics	Using Automation in The Warehouse
Warehouse Facility and Design	Managing Customer Returns	Technology in The Supply Chain

BPD06 Transport Planning

Learning Unit 1: Transport Planning	Learning Unit 2: Transport Strategies	Learning Unit 3: International Transportation
Distribution Channels	Demand for Movement	Fundamentals of Counter Trade
Design A Distribution Network	Sustainability in Transport	Fundamentals of International Trade
Developing A Retail Strategy	Transport Strategies for The Future	SADC Customs and Regulations
Planning and Scheduling of Transport	Fleet and Asset Management	Humanitarian Logistics

BPD07 Manufacturing and Operational Planning

Learning Unit 1: Manufacturing Basics	Learning Unit 2: Detail Operational Planning	Learning Unit 3: Improving Manufacturing Operations
Understanding Demand	Material Requirements Planning	Measuring Production Performance
Quality at The Source	Understanding Capacity Requirements Planning	JIT and Lean Manufacturing
Waste and Waste Elimination	Capacity Measurements and Levelling the Load	Principles of Flow Shop Operations
Production Scheduling Environment	Production Activity Control	Theory of Constraints and Continuous Improvement

BPD08 Purchasing and Procurement

Learning Unit 1: Procurement Strategy	Learning Unit 2: Supplier Interaction and Performance	Learning Unit 3: Strategic Sourcing
Procurement Management in The Supply Chain	Supplier Bidding Process	Strategic Sourcing Planning & Assessment
Strategy and Operational Planning	Supplier Negotiation	Commodity & Landscape Assessment
Strategy and Lean Principles	Supplier Selection Process	Using Cross-Function Teams to Access Data
Supplier Relationships	Supplier Performance Measurement Process	Build A Business Case

Learners can choose any two elective modules to complete their certification. On completion, the learner will be awarded with a Transport Education and Training Authority (TETA) accreditation certificate and a CILT International certificate.

The modules form part of a broader South African Qualifications Authority (SAQA) qualification and learners may choose to do additional modules and complete the full SAQA qualification.

International learners from the SADC regions have the same opportunities to achieve a certificate accredited in their own country, as well as the CILT International certificate.

Delivery Mechanism

This course is available as an e-learning course. E-learning means that you can download all your learning materials to a device of your choice and study at your own pace. The BIZZCO learning materials include a learning guide, videos and animations, online quizzes, assignments and access to an extensive glossary of terms. You are supported throughout your training program by our very experienced support team, you are never left on your own.

Estimated Time

You should plan to spend 48 hours per module, which will include the time needed to do your own research for your assignments and to deepen your own understanding.

Speak to us about other methods of training delivery and corporate customisation.
